🐙 [github.com/Rakesh-iku](https://github.com/Rakesh-iku)

## Summary

Enthusiastic Software Engineer with a strong foundation in full-stack development using Java, Python, JavaScript, and SQL. Skilled in REST APIs, OOP, and database management, with experience following SDLC and Agile methodologies. Well-versed in operating systems, computer networking (TCP/IP, DNS, DHCP), and system troubleshooting. Adaptable and solutions-driven, with interests spanning software development, backend engineering, and IT infrastructure roles.

## Education

**Sapthagiri College of Engineering**

*B.E. in Information Science and Engineering*

CGPA: 7.18/10

Dec 2021 – May 2025

*Bengaluru, Karnataka*

## Experience

**Hindustan Aeronautics Limited (HAL)**

*Graduate Trainee Apprentice*

Feb 2026 – Current

*Bengaluru, Karnataka*

- Contributed to the design and development of an Online Centralized Dispatcher System using TypeScript, Node.js, Python, Tailwind CSS, and Oracle Database, supporting full-stack development activities.
- Collaborated with cross-functional teams on requirement analysis, system architecture design, and end-to-end software development lifecycle (SDLC) activities.
- Managed and troubleshoot internal IT systems and network infrastructure, ensuring optimal performance and minimal downtime across IT operations at HAL.

## Projects

**Driver Drowsiness Detection and Alerting System** | *Python, IR sensors, OpenCV, Raspberry Pi*

May 2025

- Designed and developed a real-time Driver Drowsiness Detection System using Python, OpenCV, Raspberry Pi, and IR sensors to monitor driver alertness, improving road safety and accident prevention.
- Implemented blink detection algorithms and IR sensor-based monitoring with OpenCV on Raspberry Pi to accurately detect and analyze driver fatigue levels in real time.
- Integrated a speech-based alert system to deliver instant audio warnings, reducing fatigue-related accident risk and enhancing overall driver safety.

**Jarvis Virtual Assistant** | *Python, SpeechRecognition, VS Code*

Aug 2024

- Designed and developed a voice-based desktop virtual assistant using Python and SpeechRecognition library to automate system-level tasks and improve user productivity.
- Implemented voice command recognition to open applications, launch programs, set reminders, retrieve system information, and execute drawing functions using conditional logic.
- Integrated text-to-speech (pyttsx3) and web search automation using speech recognition to deliver a hands-free productivity-enhancing desktop experience.

**Workout and Diet Planner** | *HTML, CSS, JavaScript, VS Code*

March 2024

- Designed and developed a responsive web-based Workout and Diet Planner using HTML, CSS, and JavaScript to deliver personalized fitness and nutrition plans for users.
- Implemented an interactive UI for browsing gym products including protein supplements and fitness essentials, enhancing user engagement and experience.
- Developed beginner-friendly workout instructions, step-by-step exercise guidance, and structured diet plans to support user health and fitness goals.

## Technical Skills

**Languages:** Java, Python, JavaScript

**Web Technologies:** HTML5, CSS3, Tailwind CSS

**Databases:** MySQL, Oracle Database

**Networking:** TCP/IP, DNS, DHCP, LAN/WAN, IP Addressing, Subnetting, Network Troubleshooting

**Concepts:** Object-Oriented Programming (OOP), REST APIs, SDLC, Agile Methodologies, Operating Systems

**Developer Tools:** VS Code, Jupyter Notebook, Terminal, MS Excel, MS PowerPoint, MS Word, Jira, Power BI

## Certifications

**Full Stack Web Development** – Tap Academy

July 2025

**AI Machine Learning Engineer** – Rooman Technologies Pvt Ltd

Feb 2025

**Python Programming** – Alnitak Solutions Private Limited

Nov 2023
